Confirmation

Stora Enso Uetersen mill is producing high quality wet strength label papers in different grades to fulfil even demanding customer needs.

Paper is an ecological friendly material. When we choose raw materials for paper production, we are looking for technical properties as much as for absence of pollutants or toxic contaminants.

- For production of wood free coated paper in Stora Enso Uetersen we do not use **heavy metals** like lead, mercury, chromium(VI), antimony, arsenic, barium, selen or cadmium as elements or in chemical compounds. So our paper fulfils the European Directive for packaging waste 94/62/EC (equal with CONEG legislation in the US) and the Safety of Toys DIN EN 71-3: Migration of elements from 2002.
- The RoHS directive 2005/84/EC is not applicable for paper. But the limits for heavy metals are much higher than for Safety of Toys or for packaging waste. So even applying this (here not valid) directive would bear no risk.
- We do not use **toluene or trichlorobenzene** as raw materials in our recipes. Due to our information they are also not added as additives to our raw materials by our suppliers. So our products are compliant with directive 2005/59/EC.
- We do not use **phthalates** or their esters as raw materials in our recipes. Due to our information they are also not added as additives to our raw materials by our suppliers. So our products are compliant with directive 2005/84/EC.

We do **not** use following substances in our recipes:

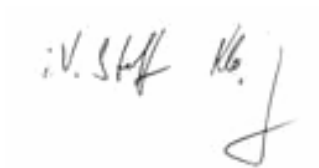

- Polybrominated biphenyls (PBB), polychlorinated biphenyls (PCB), polychlorinated naphthyls polybrominated biphenylethers,
- polyaromatic compounds like naphthaline, antracene, benz(a)antracene, Benz(a)pyren, Phenantren, Pyren etc.
- Pentachlorophenol (PCP) or other chlorhydrocarbons
- Fluorine organic compounds like perfluorooctanoic acid or perfluorooctansulfonic acid
- Organic tin species like tetrabutyltin
- Asbestos
- Primary aromatic amines
- PVC
- Beryllium or berylliumsalts
- Alkylphenol or alkylphenoethoxylate

Due to our information they are also not added as additives to our raw materials by our suppliers.

This information can only be given for the unprinted and unvarnished paper as produced and delivered by Uetersen mill. Of course we cannot guarantee for any materials like for example printing inks, varnished or adhesives that are applied out of our control.

If there are further questions, please do not hesitate to contact us under +49 4122 719 400 or steffen.kloppenborg@storaenso.com or any of our sales representatives.

Yours sincerely

A handwritten signature in black ink, appearing to read 'i.V. Steff. Kl.' followed by a stylized flourish.
